Safe Overseas Travel

With travel high on the agenda for many young Australians it seemed important to allow our year 12 students to hear the story of Nicole Fitzsimons who was tragically killed in Thailand while riding a scooter without a helmet.

The presentation was delivered in a very emotional and heart felt manner by Kate Fitzsimons, Nicole’s sister, as part of the a part of a foundation the Fitzsimons family have set up to educate young people, in the hope that no other family has to endure what they had to.

Kate’s presentation delivered a very clear message to year 12 students about the importance of smart decision making, the consequences of risk taking and the importance of travel insurance when travelling overseas.

The response from our students certainly suggested the presentation had been very meaningful for them and hopefully reinforced messages that would stay with them long beyond their school life.
