Year 12

A large number of year 12 students have taken advantage of the opportunities offered to them to work at school or with teachers on Saturday morning during term 3 or during the week’s holiday break. We encourage them to continue to work hard to finish off any assessment work they might have or to ensure they are thoroughly prepared for exams.

Last School Day

The last school day for year 12 is Friday 23rd October 2015. On this day staff will be cooking breakfast for students at school and the year 12 group will be involved in an alternative program. They will be dismissed from school at 1:30pm on this day. An information note and consent form in relation to this will be coming home shortly.

The week of the 25th to 30th October 2015 will be a ‘swat vac’ or ‘home study’ week. Students need to ensure they have a clear plan of attack to use their time to prepare for the upcoming exams. Some students may have made individual arrangements with teachers at school during this week.

All students should now have an exam timetable. Exams begin on Monday November 2nd 2015.

Graduation

All families of year 12 students should now have received a graduation information letter in the mail. Graduation is on Saturday November 21st. Tickets can be bought at the school office.

Year 12 Immunisation

The Department of Health year 12 catch-up program went off without a hitch. All students should now have a printout record of their vaccinations. In most cases students were given the first injection in relation to the Human Papillomavirus Vaccine. This is the first of three that they need to have to be fully protected. The injections need to occur at least 20 days apart so the second round will be offered to year 12 students at school on Monday 23rd November between 10:00 – 12:00noon. This is actually after they have finished school and had their Graduation but so as not to interfere with the exam period this was decided as the best course of action. The Department of Health nurses will then pass on information to students about how to access their third dose. These vaccinations are offered at this time for free.
