Year 9 Volcanoes

In the last two weeks of Semester One, 9.1, 9.2, 9.3 and 9.4 Science classes made a volcano in small groups.

They planned, constructed and designed a volcano using papier-mâché and then painted and decorated them using a variety of materials. Students simulated a volcanic eruption using Coca-Cola and Mentos or Vinegar and Bicarbonate of Soda. The end of Semester One went out with a bang!
